

All-in-one cleaner, protector & polish

MAXWAX

NEW!

A unique blend of food grade waxes taken up in a mild, deodorised organic carrier. The formulation is specifically designed to penetrate porous surfaces (such as wood), whilst leaving a thin wax film on the surface. This not only nourishes the wood like an oil, but also leaves a wax lustre to the surface which can be buffed up to a healthy sheen. Being a very hard formulation Maxwax will not collect dust or leave finger marks as other softer and more sticky waxes can.

Indoor Furniture

Here's just a few of the hundreds of useful ways MaxWax can be used in and around your home and office . . .

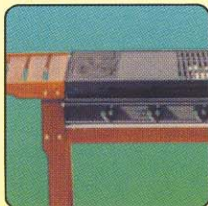

- ▶ As a furniture polish for all wooden (natural, waxed, oiled or lacquered) articles
- ▶ Hides scratches on wooden and lacquered surfaces

Outdoor Furniture

- ▶ As a protective coating for exterior furniture
- ▶ On raw wood to develop natural grain and colour
- ▶ On your BBQ non-cook surfaces to remove fat splatter and leave surfaces clean and bright
- ▶ For granite, stone and terrazzo surfaces
- ▶ For leather bags, shoes, briefcases, jackets, saddles, etc. Maxwax may darken some colours. Test a small area first before proceeding.

BBQ Cleaner

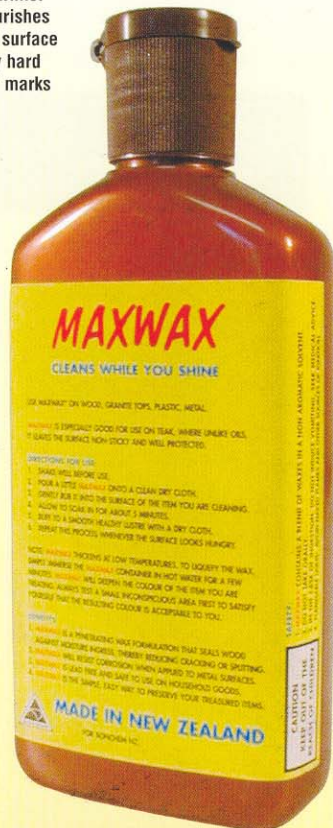

- ▶ For hard surface car interiors and exteriors (doesn't collect dust like silicones)
- ▶ Most plastics; radios, stereos, TV's etc
- ▶ Revives anodized window frames that have "dulled"
- ▶ As a metal coating to prevent tarnish of copper, brasses and silver

Maintaining Tools

- ▶ As a coating to revive and protect tool surfaces (saw blades etc)
- ▶ As a lubricant for tools
- ▶ As a lubricant for drawers that stick
- ▶ As a gift to someone you really care for
